Comments:

The place was crazy busy when we went around 3:30 in the afternoon. There is a takeout window where you can walkup and order to go. Even though it was so packed, people are constantly coming and going so we had no problem finding a table. Our server appeared right away and took our order. The servers go through a sort of buffet style line to get the coffee and the beignets. So, within just a few minutes, we had our order.
